

Corner roller for applying finish coatings with, catalogue no. **0686**

DIMENSIONS

100 mm, wire Ø 8 mm

PACKING

1 box - 10 pcs.

QUALITY GUARANTEE

Type of product:

- roller

Material:

- **working part:** nylon
- **handle:** 2K soft

Application:

- designed for applying finish coatings and other filler compounds in interior wall and ceiling corners, including gypsum boards (GK);
- suitable for embedding tape when applying finish coatings in interior wall and ceiling corners, including gypsum boards (GK).

Product description:

- the roller's special design optimizes the process of applying finish coatings in corners;
- from the first stroke, it perfectly fills corners with the compound;
- enables a single operation: embedding tape, applying the compound to the corner, and around it;
- ensures coverage of approximately 10 cm around the corner;
- the roller's high absorbency makes it very efficient.

Recommendation:

It is recommended to remove loose fibers from the roller before first use, remaining from the manufacturing process.

MADE IN POLAND

Polish manufacturer since 1987
