

NEW

Stainless steel trowel for resin bound surfaces, MASTER LINE XL, catalogue no. **0488**

DIMENSIONS

405x80x1 mm

PACKING

1 box - 10 pcs.

QUALITY GUARANTEE

Type of product:

- stainless steel trowel with MASTER LINE XL handle

Material:

- **working surface:** stainless steel
- **base:** polished aluminum
- **handle:** 3K soft-grip, XL size

Application:

- even **distribution** of stone mixtures, e.g., resin with decorative stones and microcement;
- **shaping** stone mixtures;
- **smoothing** stone mixtures, microcement, and gypsum;
- exterior work, including architectural concrete and decorative surfaces;
- **ideal** for large surface areas.

Product description:

The **Stone Carpet Trowel** is made of polished stainless steel with a thickness of **1.00 mm**, ensuring the rigidity of the working surface along its entire length. This stiffness prevents the trowel from yielding to any mixture, enabling effective shaping.

Rounded edges prevent scratches and dents, ensuring a smooth, even finish quickly and efficiently.

The tool is especially recommended for large surfaces, including stair treads, landings, and terrace slabs.

Through to its **aluminum base**, the trowel is well-balanced and reinforced, enabling precise work without discomfort.

The ergonomic, **3K soft-grip handle** is designed to minimize hand fatigue and reduce strain on the wrist, elbow, and shoulder. The three-component (3K) construction ensures a firm grip, preventing slippage and enhancing comfort during prolonged use.
