About us

We have been **operating** since 1987, when Roman Kubala, the chairman of Kubala, produced the first manual construction tools under the Kubala brand.

We **are** a family company, the winner of the Forbes Most Valuable Family Companies ranking for those who increase their value and at the same time "do it in an honest and transparent manner".

We **design** manual construction tools with the comfort, safety, and convenience of the Contractors in mind. We are the authors of 3 inventions, 2 trademarks, 10 industrial designs, 13 utility models, and 46 Community designs.

We **manufacture** tools in Ustroń in an assortment of over 700 products and deliver them to Contractors in Europe, North America, Africa, Australia, and Asia.

We **introduce** the best available technical and technological solutions by investing in educating our employees, modern machinery and improving the quality control system of our products.

We **know** how valuable the Contractors' time is and how important the quality of their work is. The result of these elements is economic success, which gives the Contractor the basis for a peaceful and happy life. That is why, in our tools, we use the best solutions and materials that guarantee quality, durability, ergonomics and work precision.

We **focus** on the needs of the Contractors, which is why we test tools together with them before introducing them for sale. We make sure that the Contractors receive tools that meet the rapid changes in finishing technology and construction chemicals as well as the high expectations of investors.

We **meet** the Contractors in person during workshops, presentations and tests organized by our traders and instructors. Our company's sales department consists of real people, happy to answer any Contractors' questions in person, by phone and e-mail.

We **communicate** with contractors in the virtual space through the website and social media. We use our own sales platforms, distributors, and commercial network to save the Contractor's time as much as possible.

We **dare** to use the Contractors' knowledge and experience. We respect their opinions and take their views into account. We are constantly in dialogue with Contractors during workshops as part of our original Kubala MasterClass project, where we all exchange knowledge and experience.

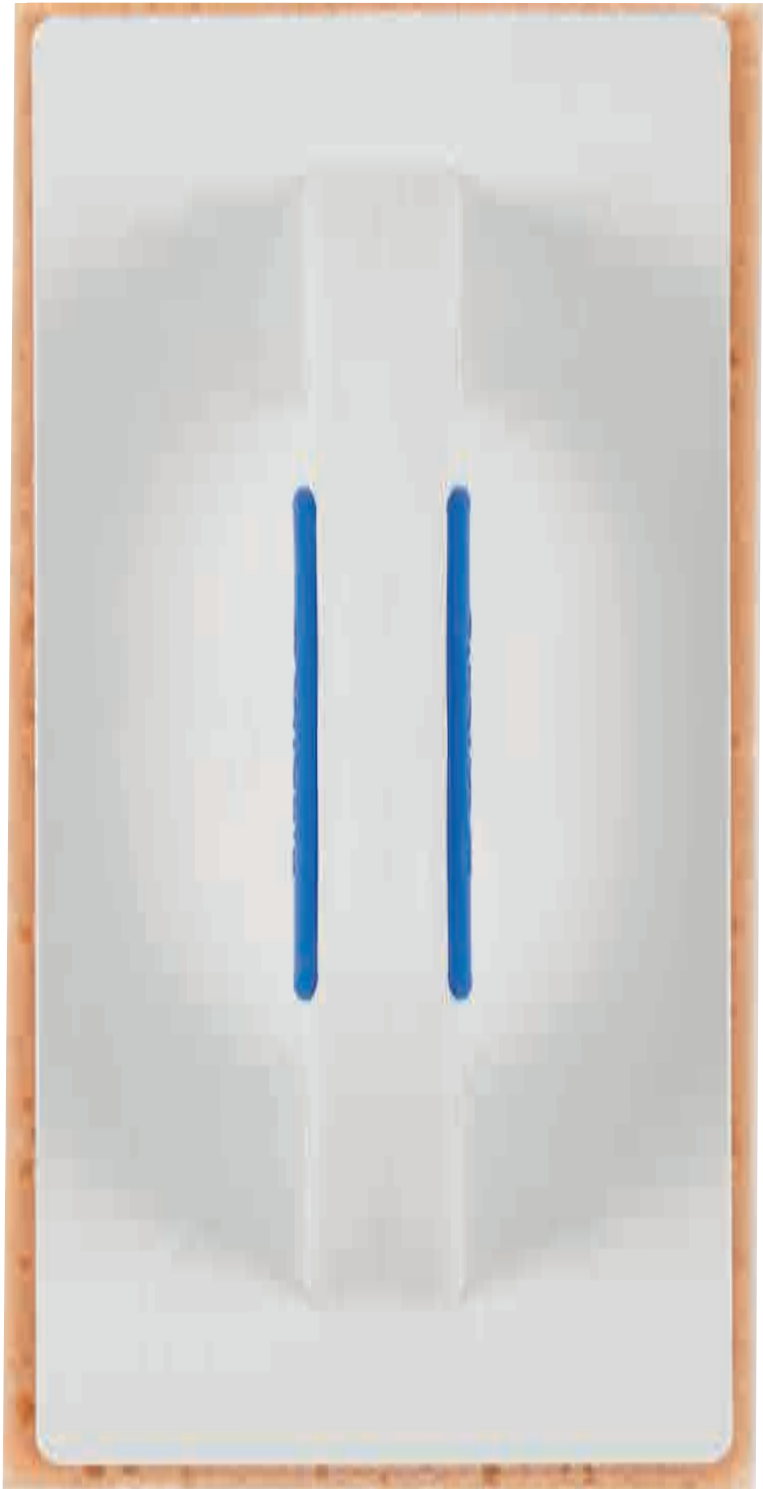

We **achieve** success because we work diligently every day to earn and enjoy the trust of our Contractors.

BUILDING
TOOLS

STYROPOR FLOATS / TOOLS FOR DECORATION / PLASTIC FLOATS

Styropor float

Paca tynkarska, Styropor Reibebrett

Hard styropor, bulk value after foaming: 200g/l, guarantees high durability and float's resistance to wearing. For plastering.

no.	dimensions	pcs.	ean
0101	140x260mm	1/10	5 017 998 501011
0102	140x500mm	1/5	5 017 998 501021
0103	140x700mm	1/5	5 017 998 501031
0105	180x320mm	1/10	5 017 998 501051

Styropor conic float

Paca tynkarska, stożkowa, Styropor Fummelbrett "Spitz"

Hard styropor, bulk value after foaming: 200g/l, guarantees high durability and float's resistance to wearing. For plastering in hard accessible places.

no.	dimensions	pcs.	ean
0107	180x320mm	1/10	5 017 998 501071

Plastic float, conic

Paca z tworzywa, stożkowa, Reibebrett für Kalkputz, "Spitz"

Plastic: PS.

Plate thickness: 2mm.

For decorative plastering of interiors.

no.	dimensions	pcs.	ean
0380	70x230mm	1/10	5 017 998 500381

Stainless steel spatula for decorative effects

Szpachla do dekoracji, Allzweck Spachtel

The entire tool is made of stainless acid-resistant steel. The spatula is designed for applying decorative masses and other finishing works.

no.	dimensions	pcs.	ean
1626	150mm	1/10	5 017 998 501621

Brush for decoration

Szczotka do dekoracji, Paddel Pinsel

The handle is made of beech wood, natural with FSC® certification. The working part is made of PET fiber. The brush is designed for creating decorative patterns and outlines when working with decorative masses. The special arrangement of the bristles facilitates achieving a precise effect on the surface.

no.	dimensions	pcs.	ean
1649	160mm	1/10	5 007793 016490

Wood-grainer

Półwałek do imitacji drewna, Maserier-werkzeug

A wood grain roller is a tool used to create the effect of natural wood grain on various surfaces. It is a type of stamp that impresses a pattern onto materials such as texture paste or decorative paint.

no.	dimensions	pcs.	ean
4041	90mm	1/10	5 007793 040410

A sample of the effect you can achieve with our product.

Plastic float, smooth

Paca z tworzywa do tynków, Reibebrett, Kunststoff, glatt

Plastic: ABS – increased hardness of the working part. Ergonomic, shaped and balanced handle. Plate thickness: 3mm. Ergonomic, shaped and balanced handle. For smoothing and structuring of plasters.

no.	dimensions	pcs.	ean
0300	130x270mm	1/12	5 007793 003000

Plastic float, smooth

Paca z tworzywa do tynków, Reibebrett, Kunststoff, glatt

Plastic: ABS - increased hardness of the working part. Ergonomic and profiled 2K soft handle. Plate thickness: 3mm. For smoothing and structuring of plasters.

no.	dimensions	pcs.	ean
0375	130x270mm	1/12	5 007793 003750

PLASTIC FLOATS

Plastic float, smooth

Paca z tworzywa do tynków, Reibebrett, Kunststoff, glatt
Plastic: PS.

Ergonomic, shaped and balanced handle.

Plate thickness: 3mm.

Perfectly even working part of the trowel

thanks to ultrasonic welding of the handle to the plate.

The float does not scratch the rubbed

surface thanks to the rounded edges.

For smoothing and structuring of plasters.

no.	dimensions	pcs.	ean
0301	130x270mm	1/12	

Plastic float, smooth

Paca z tworzywa do tynków, Reibebrett, Kunststoff, glatt
Plastic: PS - polystyrene.

Ergonomic, shaped and balanced handle.

Plate thickness: 3mm.

For smoothing and structuring of plasters.

no.	dimensions	pcs.	ean
0355	130x270mm	1/12	

Pointing float

Paca do spoinowania, Reibebrett, Kunststoff, Gummibelag
Plastic: ABS.

Ergonomic, shaped and balanced handle.

Pointing float, cut at sides in different angles

for more precise joint filling in hard accessible places.

For pointing with cement and epoxy joints.

no.	dimesions	pcs.	ean
0325	95x240mm	1/5	

Rubber stripping knife

Szpachla gumowa, Fugengummi

Plastic.

Rubber cut at sides for the more precise

joint filling in hard accessible places.

For pointing with cement and epoxy welds.

no.	dimensions	pcs.	ean
0611	145mm	1/10	
0612	245mm	1/10	

Pointing float

Paca do spoinowania, Reibebrett, Kunststoff, Gummibelag
Plastic.

Ergonomic and profiled 2K soft handle.

Float, cut at sides in different angles for more
precise joint filling in hard accessible places.

Two rounded corners.

For pointing with cement and epoxy joints.

no.	dimensions	pcs.	ean
0370	95x240mm	1/5	

PLASTIC FLOATS

Plastic float with white rubber

Paca z tworzywa z gumą białą, Reibebrett, Kunststoff, Gummibelag

Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad: white rubber, thickness: 8mm.

For pointing.

no.	dimensions	pcs.	ean
0383	140x280mm	1/12	5 007 798 038325

Plastic float with black rubber

Paca z tworzywa z gumą czarną, Reibebrett, Kunststoff, Gummibelag

Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad: Black rubber (does not crush, does not dirty the joint), thickness: 7mm.

For pointing with a cement grout.

no.	dimensions	pcs.	ean
0374	140x280mm	1/12	5 007 798 037425

Plastic float with felt

Paca z tworzywa z filcem, Reibebrett, Kunststoff, Filzbelag

Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad polishing felt (does not delaminate, does not swell), thickness: 6mm.

For smoothing of plasters.

no.	dimensions	pcs.	ean
0382	140x280mm	1/12	5 007 798 038225

Plastic float with rubber sponge

Paca z tworzywa z gąbką gumową, Reibebrett, Schwammanlage

Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Base rubber sponge, natural rubber, thickness 20 mm.

For smoothing wet gypsum plasters.

no.	dimensions	pcs.	ean
0386	140x280mm	1/12	5 007 798 038625

Plastic float with rubber hard sponge

Paca z gąbką gumową twardą, Reibebrett mit Gummischwamm

Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad hard rubber sponge, thickness: 20mm.

For smoothing of cement and lime plasters.

no.	dimensions	pcs.	ean
0397	140x280mm	1/12	5 077986 03971

Plastic float with duren

Paca z durenem, Reibebrett mit Durol-Einlage

Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad duren: thickness: 20mm. In contrast to rubber sponges, duren absorbs and slowly releases water during the smoothing.

For smoothing of cement and lime plasters.

no.	dimensions	pcs.	ean
0399	140x280mm	1/12	5 077986 03991

Articulated aluminium float with rubber sponge

Paca aluminiowa przegubowa z gąbką, Alugelenkreibebrett, Egalisette

Plate made of aluminium with handle for telescopic stick installation. Pad natural rubber sponge, thickness: 20mm.

For smoothing of wet gypsum plasters.

no.	dimensions	pcs.	ean
0333	200x400mm	1/5	5 077986 03332
0332	140x280mm	1/10	5 077986 03322
1600	200x400mm, float pad	1/20	5 077986 16007

Float with black and white fabric

Paca z białą i czarną włókniną, Reibebrett, mit Schwarz- und Weißfaser

Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Non woven fabric attached with Velcro, for cleaning and polishing of ceramic tiles, after epoxy weld pointing.

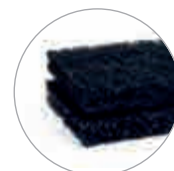

0360 - complete set: Float, black fabric - hard and white - soft

0361 - complete set: black fabric - hard and white - soft

0362 - complete set: 2 x white fabric - soft

0363 - complete set: 2 x black fabric - hard

no.	dimenstions	pcs.	ean
0360	120x250mm	1/6	5 077986 03602
0361	120x250mm	1/5	5 077986 03612
0362	120x250mm	1/5	5 077986 03622
0363	120x250mm	1/5	5 077986 03632

PLASTIC FLOATS

Plastic float with cellulose sponge

Paca z tworzywa z gąbką celulozową, Reibebrett, Celluloseschwamm
Plastic: ABS.

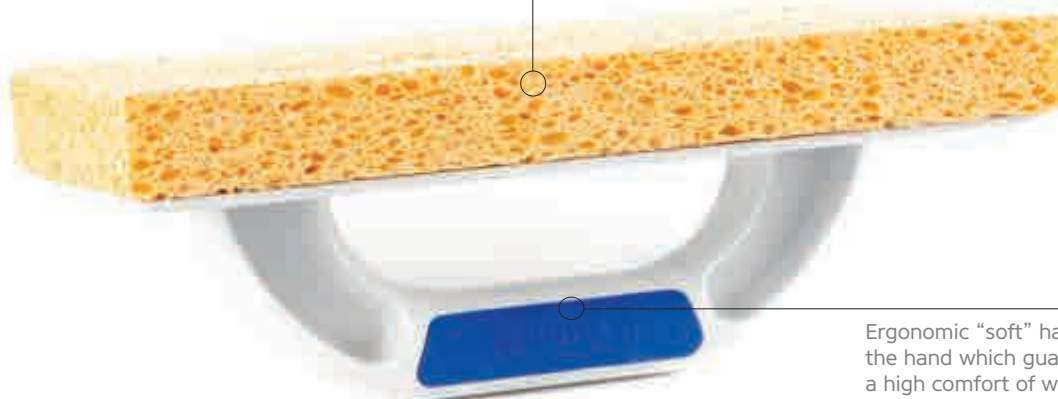

Ergonomic and profiled 2K soft handle. It does not react with epoxy joint components, it does not cause joint discoloration.

Pad cellulose sponge, thickness: 28mm.

For perfect cleaning and shaping of both cement and epoxy joint fillers.

no.	dimensions	pcs.	ean
0377	140x280mm	1/12	

For perfect cleaning and shaping of both cement and epoxy joint fillers.
High quality.

Ergonomic "soft" handle, perfectly fits the hand which guarantees a high comfort of work.

Plastic float with dense sponge with pores

Paca z gąbką porową gęstą, Reibebrett mit Schwamm, Kunststoff
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad dense sponge with pores, thickness: 30mm.

For cleaning of tiles after pointing.

no.	dimensions	pcs.	ean
0389	140x280mm	1/12	

Plastic float with truncated edge

Paca z gąbką ze ściętym bokiem, Reibebrett, Kunststoff, Schwammauflage
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad dense sponge with the longer edge truncated, thickness: 40mm.

For cleaning of tiles after pointing,
does not leave streaks on the cleaned surface.

no.	dimensions	pcs.	ean
0350	130x290mm	1/12	

Plastic float with incised sponge

Paca z tworzywa z gąbką nacinaną, Reibebrett, Hydroschwammlauflage
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad sponge with pores, dense, incised, thickness: 30mm.

For cleaning of tiles after pointing. Thanks to incisions it collects dirt from cleaned surface more easily. It is recommended to press the float against rollers of the glazing bucket to drain out the water. For cleaning of tiles after pointing.

no.	dimensions	pcs.	ean
0387	140x280mm	1/12	5 077 780 371 711

Plastic float with absorbing, incised sponge

Paca z gąbką hydrochłonną nacinaną,
Reibebrett, Hydroschwammlauflage
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad sweepex absorbing sponge, thickness: 30mm.

Thanks to the incisions it collects dirt from the cleaned surface faster. It is recommended to press the trowel on rolls from the glazing bucket. For cleaning of plates after pointing.

no.	dimensions	pcs.	ean
0378	140x280mm	1/12	5 077 780 371 711

Plastic float with incised sponge „X”

Paca z tworzywa z gąbką hydrochłonną nacinaną „X”,
Reibebrett, Hydroschwammlauflage „X”
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Primer hydrophilic sponge, thickness: 30mm.

Thanks to the "X" cutout design increases the sponge's lifespan and ensures faster removal of dirt from the cleaned surface. It is recommended to press the trowel on rolls from the glazing bucket. For cleaning of plates after pointing.

no.	dimensions	pcs.	ean
0371	140x280mm	1/12	5 077 780 371 711

Plastic float with absorbing, incised sponge

Thanks to incisions it collects dirt from cleaned surface more easily

PLASTIC FLOATS

Plastic float with coarse sponge

Paca z tworzywa z gąbką rzadką, Reibebrett, Kunststoff, Schwammauflage
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad coarse sponge, thickness: 20mm.

For cleaning of tiles after pointing.

no.	dimensions	pcs.	ean
0385	140x280mm	1/12	5 901792 103853

Plastic float with dense sponge

Paca z tworzywa z gąbką, Reibebrett, Kunststoff, Schwammauflage
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad dense sponge, thickness: 20mm.

For cleaning of plates after pointing.

no.	dimensions	pcs.	ean
0384	140x280mm	1/12	5 901792 103843

Plastic float with sparse sponge with pores

Paca z tworzywa z gąbką porową, Reibebrett, Kunststoff, Schwammauflage
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad sponge with combined pores, thickness: 30mm.

The combined pores guarantee increased sponge absorbability and better water release during pressing against rollers.

For cleaning of tiles after pointing.

no.	dimensions	pcs.	ean
0379	140x280mm	1/12	5 901792 103793

Plastic float with absorbing sponge

Paca z gąbką hydrochłonną, Reibebrett, Hydroschwammauflage
Plastic: ABS.

Ergonomic and profiled 2K soft handle.

Pad sweepex absorbing sponge, thickness: 30mm.

The combined pores guarantee increased absorbability of the sponge and better water release during pressing against the rollers.

For cleaning of tiles after pointing.

no.	dimensions	pcs.	ean
0388	140x280mm	1/12	5 901792 103883

Glazing sponge

Gąbka glazurnicza, Fliesenleger Handschwamm

1680 - dense sponge

1683 - absorbing sponge sweepex. Combined pores guarantee sponge's increased absorbability and better water release

1684 - dense sponge with pores

1689 - hard sponge with combined pores. Combined pores guarantee sponge's increased absorbability and better water release. For washing tiles after pointing.

1692 - absorbing sponge sweepex MASTER. The material is soft and delicate. The sponge structure ensures better absorbency and water drainage. It cleans and shapes cement grouts, providing significant smoothing of the joint. The sponge is infused with an agent to prevent the growth of bacteria and fungi. Used for washing tiles after grouting.

Abrasive float 'rasp-type'

Paca szlifierska "tarnik" przelotowa, Handschleifer zum Anrauen

Plastic: PS. Working part made of galvanised, perforated plate.

Ergonomic, shaped, 2K soft handle.

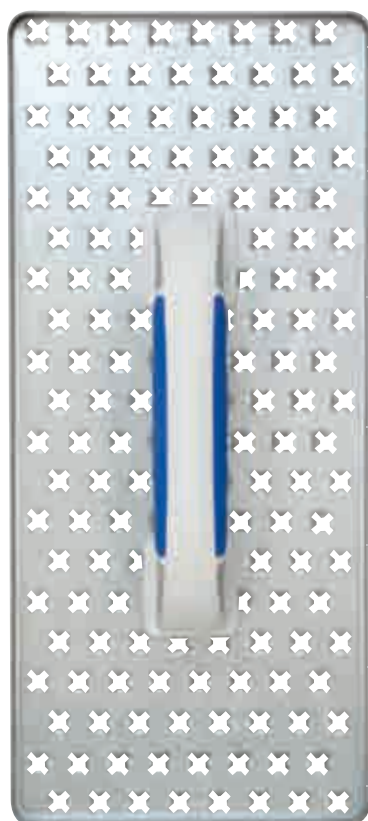

The perforated plate is in line with holes of the working part, what guarantees easy cleaning and longer durability of the tool.

For thermal insulation works, including styropor boards.

no.	dimensions	pcs.	ean
0342	160x380mm	1/10	

Abrasive float 'rasp-type' MASTER LINE, 0346

MADE IN POLAND
Polish manufacturer from 1987

THREE-COMPONENT HANDLE
Ensuring the highest comfort of work

QUALITY GUARANTEE
Blades perfectly prepared to work with the material

REGISTERED DESIGN
Submitted to the Polish Patent Office under the number W.127633

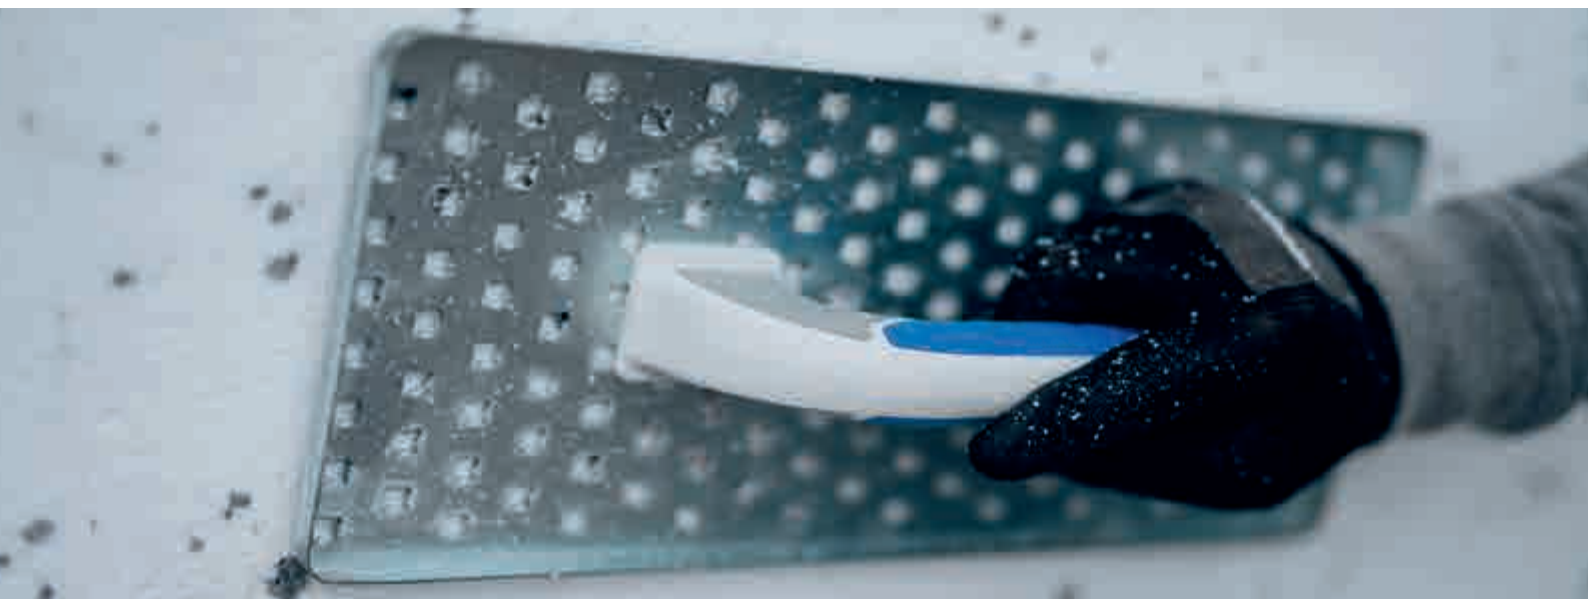

WORKING PART THICKNESS
The use of thicker sheet metal extends the durability and rigidity of the working part

STRAIGHT-THROUGH
Lack of a plastic plate causes increased throughput

WEIGHT
Reduced weight of the product

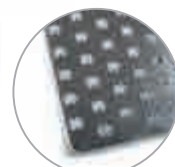

Abrasive float 'rasp-type' MASTER LINE

Paca szlifierska "tarnik" przelotowa, Handschleifer zum Anrauen
Working part of the rasp is made of 1mm thick galvanized steel.
Lack of a plastic plate causes increased throughput.
Reduced weight of the product is aimed at reducing the end-users workload during long hours of work.
Ergonomic, 3K soft handle fits perfectly in the hand, ensuring the highest comfort of work.
Tool does not rotate in hand, even when working in a glove.
For levelling of styropor boards during thermal insulation works.

Float grinded from the
bottom alongside the longer
edges and through its center.

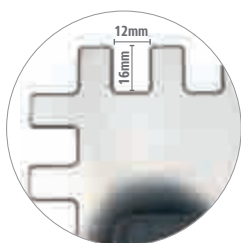

Stainless steel trowel, LARGE FORMAT

Paca nierdzewna, WIELKI FORMAT,
Glättkelle, Edelstahl, GROSSES FORMAT

Ergonomic, balanced, shaped 2K soft handle on extended jacking foot made by polyamide with fiberglass. Extended jacking foot guarantees better stability of the working part. Stainless, acid resistant steel, thickness: 0,7mm. Float for spreading self-flowing, thick-layer and deformable adhesives on large-format tiles.

no.	dimensions	pcs.	ean
0258	130x355mm, notch 12x16	1/10	

The height and shape of the tooth allow for a single layer of adhesive to be applied to the working surface, as well as a thin reinforcing layer on the tile (combined method used in tiling)

The special shape, rounded inner and outer corners ensure that the previously applied insulation coating is not damaged

* SBW - an industry association established to improve the professional qualifications of contractors.

Trowel for joining plasterboards, MASTER LINE XL

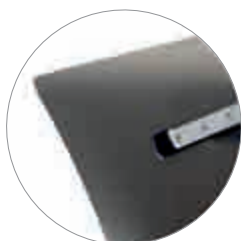

Paca nierdzewna GK, MASTER LINE XL

Kantenstreicher, Glättkelle, Edelstahl GK, MASTER LINE XL

Ergonomic, balanced, shaped, 3K soft handle on extended aluminium jacking foot, guarantees better stability of the working part.

Stainless, acid resistant steel, thickness: 1 mm.

For joining plasterboards.

The specially contoured concave working part, with the appropriate cutout, completely eliminating any spillage beyond the defined surface

The convex part is used for embedding reinforcing tapes at the recommended depth

The use of this trowel eliminates errors commonly made during the treatment of gypsum board joints

Master Class

ACADEMY

 **Kubala®**

The Kubala MasterClass is our proprietary project aimed directly at Contractors to support and facilitate their professional development. The Academy conducts training courses that encourage them not to fall into a rut, to look for new solutions and improve their qualifications. We are a manufacturer of construction hand tools, and our offer is constantly expanding. So, it is important to us that Contractors understand why and when it is worth using particular tools. How to increase the work's efficiency and improve the quality of work with the right choice of tool. Our instructors are practitioners who teach how to use the novelties appearing on the market and how to select tools to get spectacular results. The opportunity for personal contact with Contractors during training sessions is also very valuable to us. Thanks to these meetings, we can quickly respond to the needs of Contractors and introduce the best solutions for them. As part of the Kubala MasterClass project, we cooperate with and support finishing industry associations and vocational schools.

We believe it is worth expanding knowledge and exchanging experiences, especially in a world that is changing so quickly, and knowledge is outdated by rapidly evolving technology.
